

# “Landscape Report”. Researches for Italian Ministry of Cultural Heritage for the application of National Decree (DCPM 05.12.12)

## Principles

Each project/realization should be **appropriated** - not only **compatible** – to the site landscape characters  
Each project/realization should not damage but improve the landscape quality

## Contents

- ✓ The **technical, essential, specific** documentation for the landscape evaluation of territorial transformation projects
- ✓ Different types of intervention (buildings, infrastructures, antennas, panels, ...)
- ✓ Modalities of analysis and representation of the landscape context in relationship with the landscape quality objectives
- ✓ Orientations to the synthetic principles of landscape compatibility evaluation (quality and criticism, anthropic and natural risk, modifications and alterations)

### ***Landscape Report. Purposes and contents***, taken from:

Anna Di Bene and Lionella Scazzosi (edited by), ***La Relazione Paesaggistica. Finalità e contenuti***, Gangemi, Roma, 2006

**Searches on the main European and Italian experiences about the tools for “landscaped compatibility” in the planning instruments.**

Countries examined: France, Germany, United Kingdom, Italy.  
Italian Regions examined: Emilia Romagna, Liguria, Lombardia, Piemonte, Umbria.
