

# European research and action network on intra or peri-urban agricultural spaces

Paola Branduini and Franco Sangiorgi

**THEME** comparing experiments carried out in peri-urban territories in the European Countries

**OBJECTIVES** analyzing the features and dynamics in the European peri-urban areas and discuss their roles in order to better manage transformations. Setting up an exchange and cooperation network between scholars and experts: town planners, local authorities, farmers, "urban gardeners", green spaces managers and researchers.

Understanding contemporary changes from the different viewpoints: agronomy, landscape architecture and buildings, town planning, urban sociology, urban anthropology, geography etc....

Papers of the International Workshop – Palazzo Feltrinelli 24-25 October 2003
