

The Franciacorta Landscape

Analysis and suggestions for a widespread museum

Alessandro Cantaboni – Luca Manenti

AREA Franciacorta, Brescia

THEME: rehabilitation and enhancement of a landscape by designing a scattered museum.

OBJECTIVE: starting a knowledge and enhancement process of the cultural, architectural and natural qualities offered by the territory as well as a rehabilitation process of degraded areas.

PROJECT: developing an itinerary along the whole territory of Franciacorta from which further thematic sub-itineraries may start linking the landscape macro-systems during the analysis: homogeneous “rooms” are then identified according to their characters, structures and landscape elements. The project provides detailed enhancing guidelines useful for territorial planning tools (Territorial Plan of Provincial Coordination, Management Plan of the Municipal Territory).
